Flexible multilayer hose.

Exterior covering in ultra UV resistant PVC. With woven polyester fibre reinforcement and two-layer smooth black inertube.

- 1 2 Yellow PVC covering
- 3 Woven fibre reinforcement
- 4 5 Smooth black two-layer inner tube

Applications

- Irrigation
- Aspersion
- Watersupply and delivery

Sectors of activity

- Farms
- Vegetable growers
- Horticulture
- Water supply and delivery in industry, construction sites and road works
- Gardening

Advantages

The multilayer design, made of an exclusive woven fibre and a double core layer, ensures that Tricoflex is highly flexible for easy handling, with excellent resistance to repeated bending, crushing and pulling as well as minor deformation under pressure.

In addition, the inner surface is extremely smooth, thereby facilitating water carrying and guaranteeing flow regularity. Especially

thick and made of high quality materials, Tricoflex offers remarkable ageing resistance with exceptional preservation of flexibility. Its exterior yellow PVC covering gives it good protection against abrasion and UV rays.

Chemical resistance

See table pages 47 to 51 column A.

Connectors

Connectors with band, screw or butterfly clamps. Automatic connectors for watering.
